Sagittal notation

sliders move through the fifths chain;
1/1 must be bare;
bbF and xB are absolute bounds for min and max;
min and max cannot be on the other side of 1/1

Optimize...

get the other suggestions back in view by clicking in the input box or on the previously selected suggestion

space automatically opens open to make room for multiple suggestions; to collapse the multiple suggestions down into one choice and get it to connect with the staff section below and produce a notated pitch there, just click on one

Copy...

copy as MusicXML, ASCII, Unicode, etc.

opens a pop-up with options for accuracy, simplicity, distribution of nominals, preserving your choice of nominal as 1/1, not crossing nominals, very close pitches sharing nominals, fewest fifths in pitches, etc.
